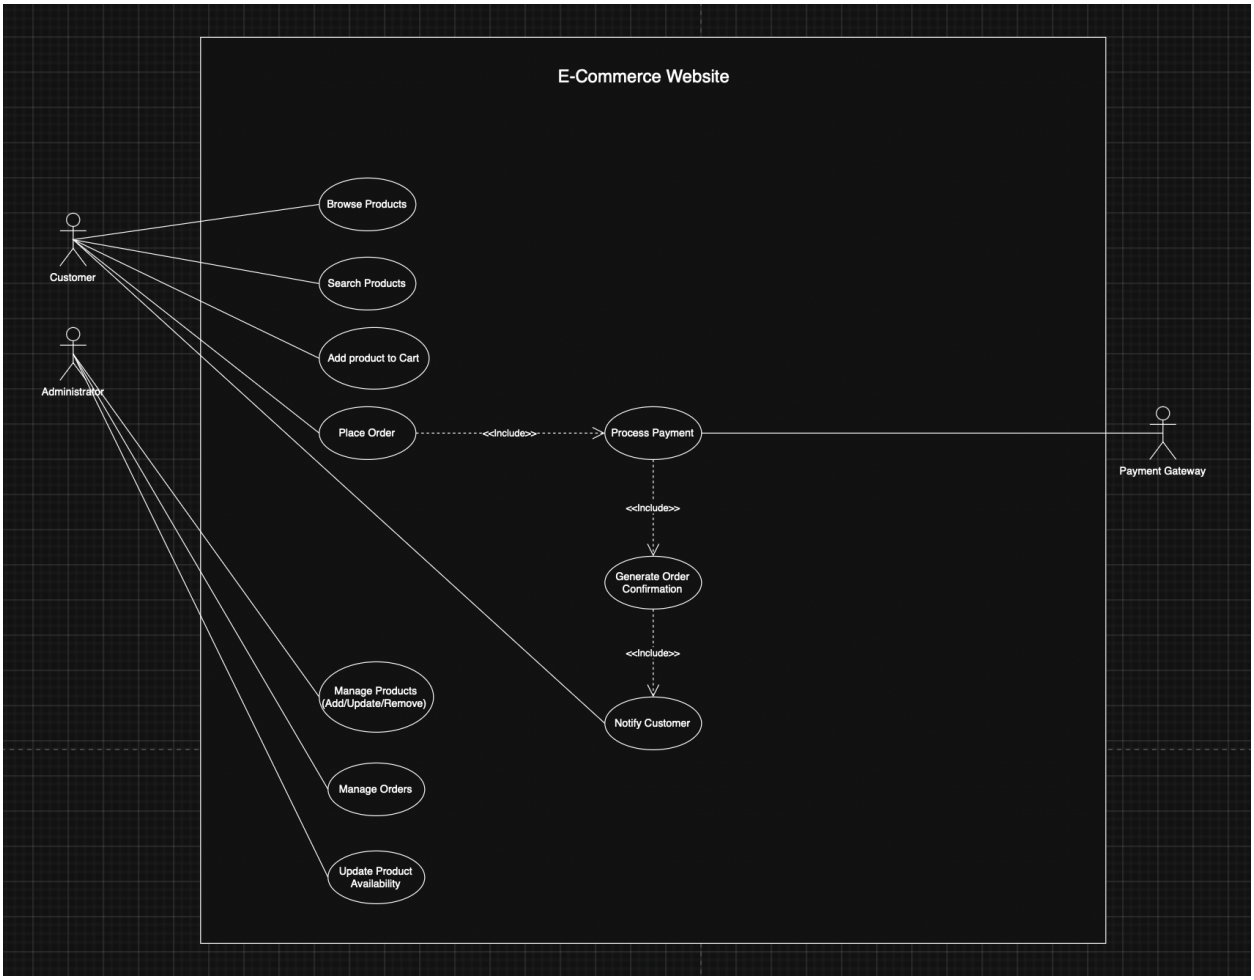
Use-Case Diagram:



Use Case Description Table

After drawing the use case diagram, you need to describe the behavior of each use case. Use the below template to describe use cases.

Use case UC- 2: Search Products (by name)

Use Case	***Case Name***	
Goal	Allow the customer to find products by entering a product name	
Preconditions	The customer is on the e-commerce website.	
Success End Condition	Matching products are displayed to the customer.	
Failed End Condition	An error message appears, and the search is not completed.	
Primary Actors	Customer	
Trigger	Customer types a product name and clicks Search	
Description / Main Success Scenario	***Step***	***Action***
	1	Customer enters a product name (keyword) in the search bar.
	2	Customer submits the search request.
	3	System validates the input
	4	System searches the product catalog for matching names.
	5	System displays the list of matching products
Alternative Flows	***Step***	***Branching Action***
	3a	If the search keyword is empty, the system asks the customer to enter a product name.
	5a	If no matching products are found, the system displays “No results found” and suggests trying another keyword.
	4a-5b	If a system error happens, the system shows an error message and asks the customer to try again later.
